

ENVIRONMENTAL Policy

Parotec Solutions design and manufacture enclosures for the protection and presentation of client's products across a variety of sectors; aerospace, automotive, electronics, health care, retail and museums.

At Parotec Solutions we recognise our manufacturing activities have an impact on the environment. As such, we are committed to reducing this impact through a process of continual improvement across our operations.

To minimise our environmental impact, our priorities are:

- **Reduce** the production of process waste, namely expanded Polyethylene/Polyurethane foam offcuts
- **Reuse** foam offcuts by donating to local businesses for use as packaging
- **Recycle** all remaining foam offcuts and High Impact Polystyrene
- **Minimise** the use of energy to power equipment and heat the warehouse and office facilities
- Work with local **suppliers** where possible
- Reduce impacts of **travel** associated with deliveries and distribution
- Purchase/ use **Electric or Hybrid** vehicles where appropriate
- Consider environmental factors when **purchasing** materials and services
- Encourage and promote environmental **awareness** amongst staff
- **Comply** with all relevant environmental legislation and obligations
- Prevent **pollution** arising from leaks, spills and other incidents

To enable us to achieve our commitment we will:

- **Provide** environmental training to all staff appropriate to their role and responsibilities
- **Monitor** environmental performance indicators including waste volumes, gas consumption and electricity use
- Develop and maintain an environmental **action plan**.

This policy is communicated to staff and made available to all stakeholders via the company website. Responsibility for the policy is with the Managing Director who will review the policy annually and progress against the policy on a quarterly basis.

Robert Atkins
